OVERVIEW

Name : Wallet – Prepayment

Version : 2.2.0

Prestashop : 1.5 - 1.6

Author : Agencya

Licence

The source code of this module is under commercial license.

Each license is unique and can only be installed and used on one shop.

Any reproduction or total or partial representation of the module, one or more of its components, by any process whatsoever without express authorization from us is prohibited.

If you have not received this module from us, thank you for contacting us.

Do not edit / do not add files or code to this module if you want to update it in the future.

If you want to customize this unit to suit your needs, please contact us! !

About

The wallet module is a simple and effective payment method which will help you to develop your business thanks to an intuitive management of deposits, orders, and gifts

What this module does for you ?

- Boost and diversify the activities of your shop by providing a simple and effective payment method for your customers
- Manage deposits, orders, payments and gifts intuitively and keep an eye on all activities carried out on the whole wallets
- Speed up the time for processing orders with instant payment.
- Boost the conversion rate of your shop through the gift system (credits bonus directly into the customer wallet) multi-criteria and customizable, fully promoting sales

Support

In case of malfunction, thank you for contacting us, we provide free module corrections. We offer regular module updates with exciting new features.

MODULE INSTALLATION

Prerequisite

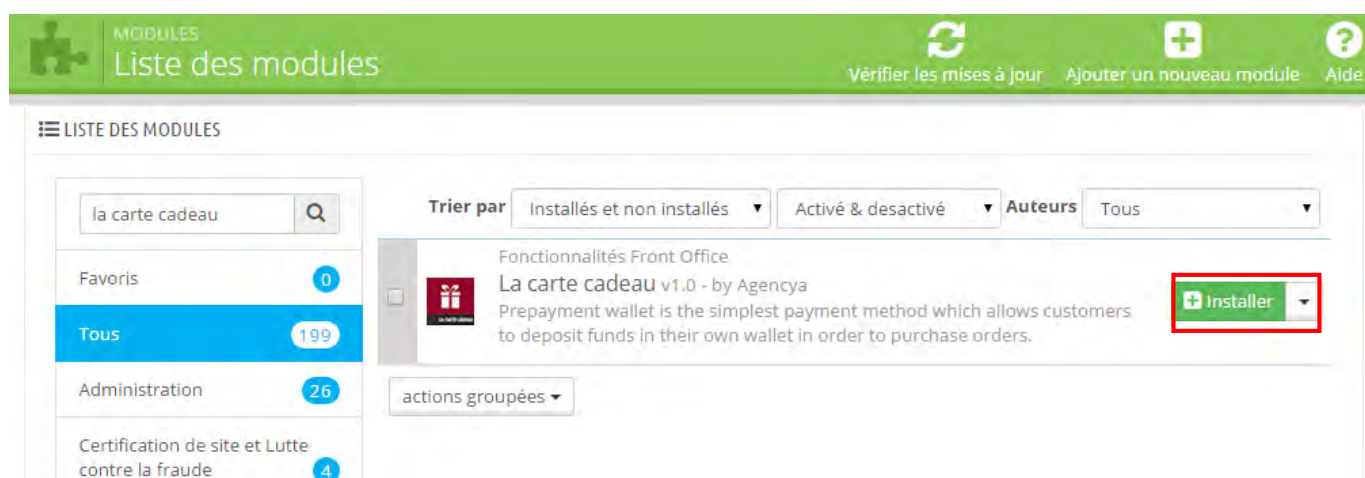

You need to have installed a working version of PrestaShop 1.5.x/1.6.x version on your server:

<http://www.prestashop.com/en/download>

Installation

The module is installed with transparency, no core files are altered or modified, enabling the continuity of future updates to your shop.

1. Unzip the archive containing the module to a temporary directory
2. Transfer the entire folder contents via your ftp server to the directory 'root/modules/'
3. Connect to your back-office, click on the menu 'Modules', search for the module 'Prepayment', then click on the button 'Install'.

Module Configuration

1. Connect to your back-office, menu 'Modules'
2. Click on the button 'Configure' on the right of the module 'Prepayment'

Fonctionnalités Front Office
La carte cadeau v1.0 - by Agencya
Prepayment wallet is the simplest payment method which allows customers to deposit funds in their own wallet in order to purchase orders.

 Configurer

The module configuration page is now displayed

Modules / prepayment / Configurer

Configurer le module "Porte-monnaie"

Précédent Traduire Vérifier la mise à jour Points d'accroche

CONFIGURATION

Devise des packs de crédits Euro
Sélectionnez la devise par défaut des packs de crédits

Activer les balances négatives OUI NON
Autorise les clients de votre boutique à régler des commandes avec leur porte-monnaie même si celui-ci n'est pas crédité

Montant maximum de la balance négative 0 €
Laissez 0 pour désactiver cette fonctionnalité

Ouvrir le porte-monnaie avec la création du compte client OUI NON
Activez cette option si vous souhaitez que le porte-monnaie du client se crée automatiquement lorsque celui-ci finalise son inscription sur votre boutique.

Décaissement des dépôts OUI NON
Activez cette option pour autoriser le remboursement dépôts. Le montant du dépôt sera débité du porte-monnaie du client

Remboursement des commandes dans le porte-monnaie OUI NON
Activez cette option pour créditer automatiquement le porte-monnaie du client sur les remboursements des commandes, même si celles-ci ont été réglées avec un autre moyen de paiement.

Afficher les packs sur la colonne OUI NON
Activez cette option pour afficher les packs de crédit dans la colonne de gauche/droite

Afficher les règles cadeau OUI NON
Affiche les cadeaux disponibles sur la colonne de gauche/droite

Afficher un lien 'Créditer mon porte-monnaie' dans le top-menu OUI NON
Activez cette option pour créer un lien rapide vers la page d'achat de crédits dans le top-menu

- **Credit Packs default currency** : Useful if you have several currencies installed on your shop. Select the default currency for deposits. Each credit pack will be converted in other currency by applying conversion rates
- **Enable partial payment** : Allow customers to partially pay orders with the credits left on their wallet and pay the rest with another payment method.
- **Enable negative balance** : Allow customers to purchase orders with negative balance

- **Maximum negative balance to purchase orders** : Set the maximum negative balance to let your customers purchase orders. Set 0 to disable this feature.
- **Open wallet with customer registration** : Enable this option to automatically open the customer wallet on account creation.
- **Disbursement on deposits** : Enable this option to allow refund of deposits. The deposit amount will be directly debited from the customer wallet.
- **Refund orders in wallet** : Enable this option to automatically credit back the customer wallet on order refund, even if the order has been paid with another payment method
- **Display packs in column** : Enable this option to display active packs in the left/right column
- **Display gift rules in column** : Enable this option to display active gift rules in the left/right column.
- **Display a deposit funds link in top menu** : Enable this option to add a quick link to the deposit funds page in the top menu.

To save your changes, click 'Save'.

First Use

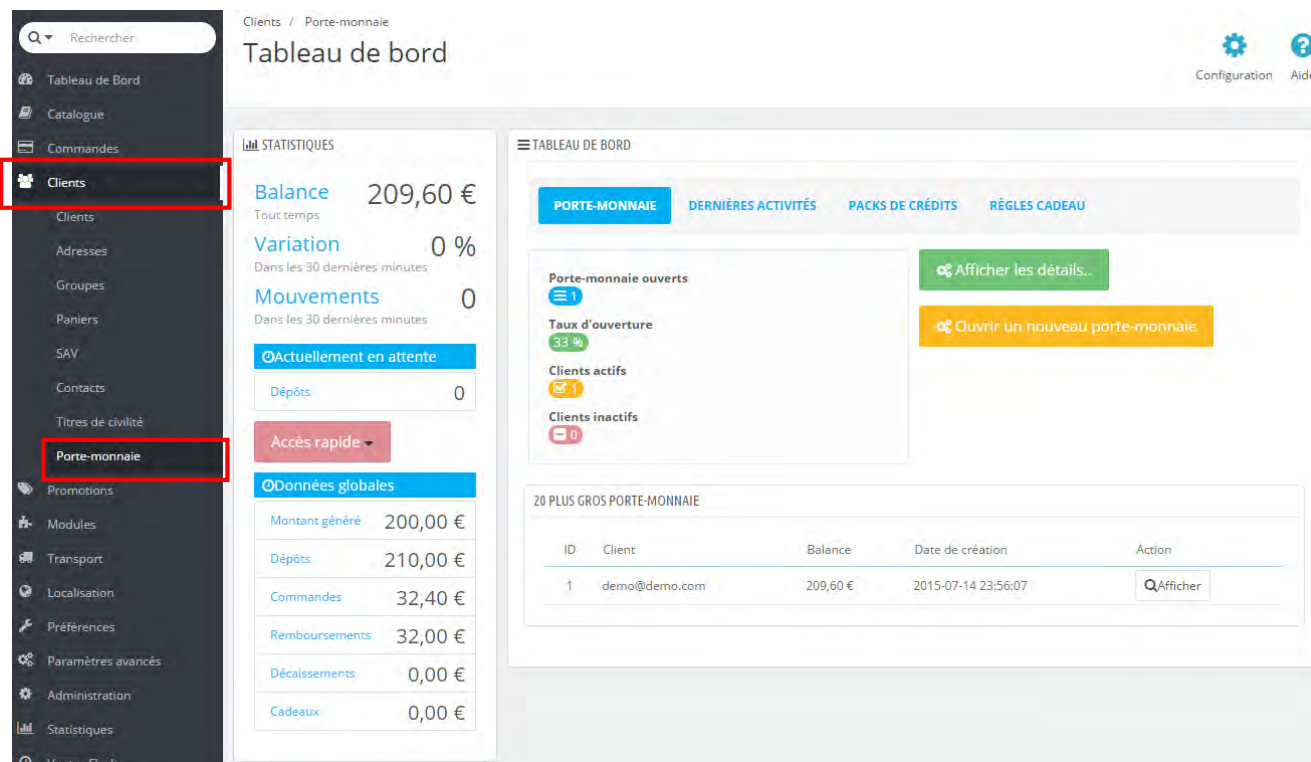

Once the module installed and configure, the next step is to create credit pack corresponding to the deposits that will make the customers on their wallets.

(cf. Credit Packs Management/ Adding a new credit pack)

BACK-OFFICE FEATURES

Displaying dashboard

1. Connect to your back-office
2. Click on the menu 'Customers / Wallet'

The screenshot shows the Prestashop back-office dashboard. On the left sidebar, the 'Clients' menu item is highlighted with a red box, and the 'Porte-monnaie' (Wallet) menu item is also highlighted with a red box. The main content area displays the 'Tableau de bord' (Dashboard) for the 'Porte-monnaie' section. It includes a 'STATISTIQUES' (Statistics) section with a balance of 209,60 €, a variation of 0%, and movements of 0. Below this is a 'Données globales' (Global data) section with a table of wallet activities. The table has columns for ID, Client, Balance, Date de création, and Action. The first row shows a wallet with ID 1, Client demo@demo.com, Balance 209,60 €, and Date de création 2015-07-14 23:56:07. The table is titled '20 PLUS GROS PORTE-MONNAIE' (20 LARGEST WALLETS).

The dashboard provides an overview of all activities and movements related to customers' wallets

Views

The views provide data required for monitoring wallet activities.

Balance : total number of credits available in all open wallets.

Tendance : balance variation depending on movements in the last 30 minutes

Movements : number of movements in the last 30 minutes

Pending deposits : number of pending deposits awaiting payment validation. Click on the link to directly go to the order listing page.

Quick Access : Direct access to the wallet listing page, last activities, credit packs and settings

Amount earned : Total amount generated in current currency from the sales of credit packs.

Deposits : Total amount generated from deposits (including free extra credits).

Orders : Total amount generated from orders paid with wallets

Refunds : Total amount generated from order refunds on wallets.

Disbursements : Total amount generated from credit disbursements on wallets

Gifts : Total amount generated from gift rules on orders

Dashboard

The dashboard let you manage all activities related to the module: customers' wallets, last activities, credit packs and gift rules.

- The tab 'Wallet' contains additional statistics exclusively linked to the activities of customer wallets.
- The tab 'Last Activities' contains all movements of customer wallets (deposit, order, refund, disbursement).
When customers use their wallet as a payment or make a deposit, the movement will appear in the history.
- Credit packs are assimilated to a fixed deposit amount.
They are treated like other regular products from your catalog
- The gift rules let you offer free credits when an order is purchased depending on the customer cart. If the client met the conditions of the rule, additional credits will be directly added to the wallet once the order validated.

Managing wallets

Displaying details for wallets

1. Go to the dashboard (cf. Displaying Dashboard) – tab 'Wallet'
2. Click on the button 'Display details'

This page contains all opened wallets and some information about their movements. Each wallet is bound to a single client.

✓ Valider le mouvement

- Select the movement
 - To credit some funds on the wallet, check the box 'Deposit'
 - To debit some funds on the wallet, check the box 'Disbursement'
- Fill others fields related to the new movement.
 - The field 'label' is used to clarify the nature of the movement. This will be visible to the customer on his dashboard in front office.
 - The field 'amount' corresponds to funds which will be credited or debited from the customer wallet
- Click on the button 'Validate the movement' to save modifications

The movement now appears in the last activities as a manual deposit / disbursement.

You can edit it (change the amount, the label, the type of movement or customer) or delete it.

Validating a deposit

When customers purchase a credit pack, this one appears in the last activities as a 'Deposit' with the order status 'Awaiting payment'.

Once the payment received, you have to change the order status to 'payment accepted' in order to credit the customer wallet with the related deposit amount.

1. Search for the deposit whose the payment is pending and click on the button 'View' on the right of the corresponding row

If the balance of customers' wallet is less than the order, amount, they will be redirected to the payment method selection.

Partial payment with wallet

To use this feature, it is necessary to activate the "Enable partial payments" in the module configuration page.

This feature allows your users to partially pay the amount of an order with the remaining balance on the wallet and pay the rest with another payment method.

Pay an order

If users have a positive balance in their wallet but less than the amount of the order, the button Partial Payment will be visible during the payment validation via the wallet.

RÉSUMÉ DE LA COMMANDE

PORTE-MONNAIE

Vous avez choisi de régler avec votre porte-monnaie. Voici un bref récapitulatif de votre commande:
